

CARBEE v2.0 HYDRAULIC PIPE RAIL TROLLEY

Carbee 2.0 is a new product designed for the care of plants grown in a greenhouse. The multifunction steering wheel used on the front of the device allows you to move around the heating pipes and the concrete connector of the greenhouse without having to leave the work platform of the trolley.

Working platform is mounted on a three- scissor hydraulic system. A number of applied solutions ensure quiet and comfortable operation. The entry doors on the rear of the trolley are secured with a lock increasing the security level. The control panel is appropriately marked, which ensures intuitive work with the device.

390 KG

2x 0,50 kW

2x140 AH

Hydraulic

MAX 120KG

MAX 3615 mm

Control panel with buttons and switches in durable metal housings. Contactless, shockproof and waterproof potentiometer for adjusting the travel speed. The photo shows the actual arrangement of the switches and their marking.

Multifunctional folding steering wheel with a traction switch, which allows you to move around the connector without leaving the work platform.

The device uses a scissor system of hydraulic operated platform supported by hydraulic actuator and efficient power pack.

Bottom control panel with main switch, internal charger socket, emergency safety switch and service platform level adjustment switch. The product is also available with an external charger.

Foldable step for easy access to the work platform.

Durable inductive foot switch and non-slip work platform.

Carbee 2.0 is an intuitive care trolley that is comfortable to work with and, above all, safe for the user. It allows free movement on heating pipes. After lowering the platform, the folding steering wheel allows you to move around the greenhouse connector and change the rows.
